

Introduction to the Development of “Digital Fuzhou”

Fuzhou Municipal Administration Commission of
Big Data Development
Zhang Jihuan

Starting to develop “Digital Fujian” in 2000

Taking the lead to establish the Leading Group and the Office for Developing “Digital Fuzhou” in China in 2001

Establishing the Leading Group for Developing Fuzhou Big Data Industries in 2016 and setting up Fuzhou Municipal Big Data Office under the group

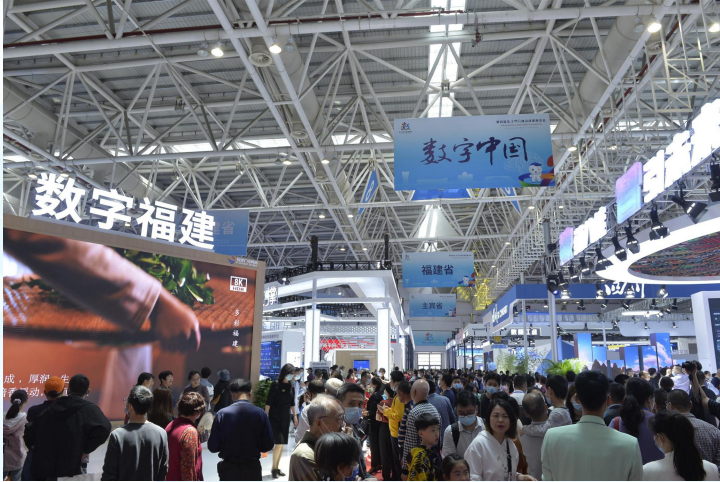

Integrating functions of information technology management of related units to form Fuzhou Municipal Administration Commission of Big Data Development in 2018

At present, under the guidance of the “Digital China” strategy, we adhere to the spirit of the “3820” strategic project (a strategic plan for 3 years, 8 years and 20 years of Fuzhou’s economic and social development) and give full play to the empowerment of digital technology, so as to contribute to the development of a modern international city.

1. Creating a good environment and reinforcing the foundation for development

Since 2018, Fuzhou has successfully held four **Digital China Summits.**

2. Fostering the digital industry and laying solid groundwork for development

Since 2017, led by **“Digital China”** and **“Developing Eastwards and Southwards, Along the River and Towards the Ocean”** strategies, Fuzhou has developed a number of supporting facilities for the digital industry.

Binhai New Town

Giving full play to catalytic role of the pilot zone
Exploring a unique path of “**industrial digitization and industrialization of digital business**”

As one of the largest big data industrial clusters in Fujian Province, Southeast Big Data Industrial Park is already home to **over 600 companies**, with a registered capital of **51.2 billion yuan**.

Fuzhou High-Tech Zone

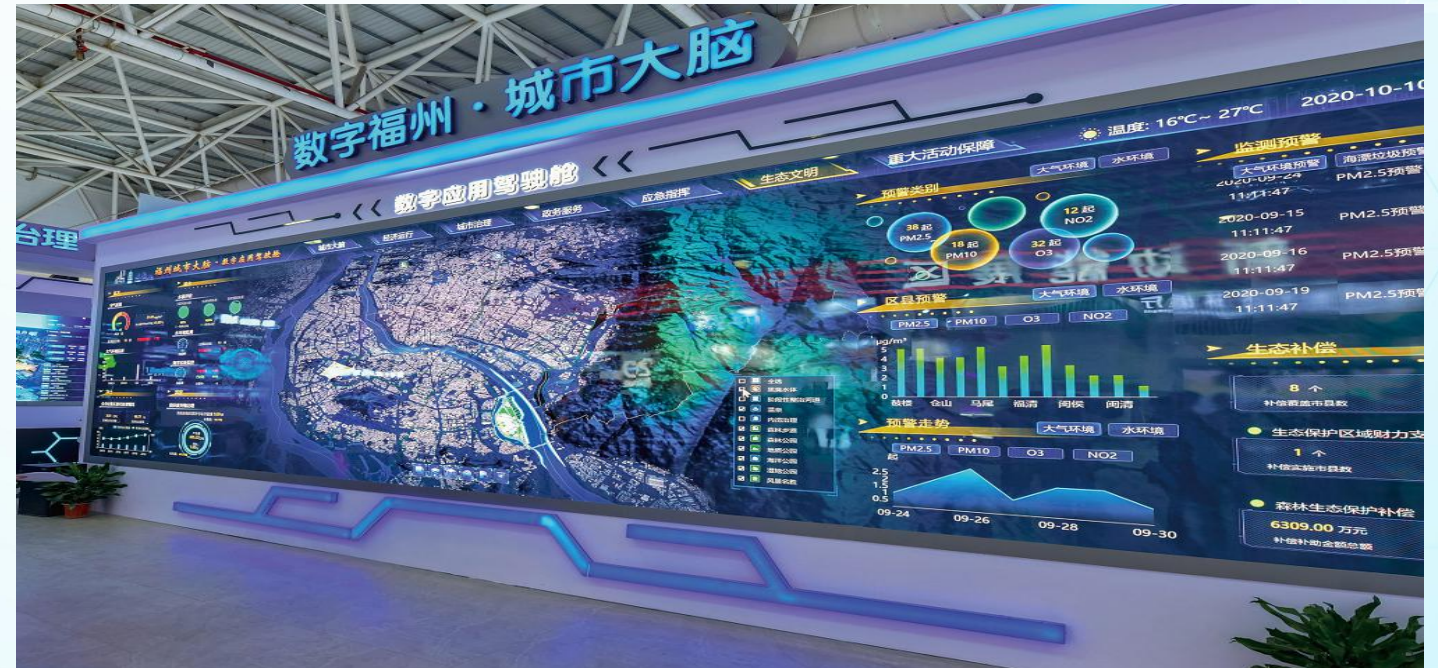

Fostering industrial application of academic achievements by taking advantages of academic foundation and concentrated resources of optoelectronics.

3. Digital Empowerment for Transforming Development Forces

On the one hand, Fuzhou has developed **municipal big data platforms** such as Cloud Platform of Government Affairs, Smart Network (Governmental Extranet), and other platforms for governmental data concentrating and sharing, credit information, temporal-spatial information, one-stop bill-paying service, medical service, etc.

On the other hand, constantly **expand** application of digital technologies into various fields.

Policy Guidance and Support

Strong Top-Down Design

Since 2005, Fuzhou has formulated 3 medium-and-long-term plans for "Digital Fuzhou" development. The key tasks of "Digital Fuzhou" are set yearly. The planning and implementation are both done in a unified manner. "Interim Measures to Manage Informationization Projects with Governmental Investment" were formulated to regulate the management of special funds for informationization.

7 Measures for Speeding up Digital Economy Growth

3 Measures for Accelerating Block Chain Development

3 Measures for Fostering Big Data Development

10 Measures for Promoting VR Industry

Several Measures for Construction and Integrated Utilization
of New-Type Infrastructure
